Audit and Inspection Made Easy

You need a reliable way to gauge your EHS and sustainability performance against any number of regulations, internal policies and industry standards. When you're responsible for audit & inspection programs across complex facilities or Large enterprises subject to multiple regulatory jurisdictions, managing it all can be overwhelming.

The Green Codes Audit & Inspection product enables you to conduct audits and inspections across your entire organization using a single, centralized software system.

Quickly and easily deploy an unlimited number of pre-built and custom checklists to pinpoint non-conformances and potential hazards, and instantly initiate corrective actions to bring your compliance up to speed.

Design and User Interface

Multilingual Interface

Simple and intuitive user interface makes incident/near miss/hazard entry, analysis, and reporting fast and easy for users of all levels

System can be scaled across your entire enterprise, from the individual department or facility level, to every location throughout your organization

Mobile App (Android iOS) makes core system features and functionality fully available through your tablet or smart phone

Easy-to-use administrative controls and settings mean there's no need to hire additional IT staff or system admins to maintain your system

Maintain your system without the need to hire additional IT staff or system admins using our easy-to-use administrative controls

Comprehensive Audit and Inspection Management

Schedule, assign and perform workplace audits and inspections using a single, easy-to-use cloud-based system

Build tailored checklists and assign them to any of your locations to help standardize and control EHS compliance across your organization

Manage and update checklist templates in real-time, with checklist edits instantly reflected across your entire organization

Record findings, recommendations and notes for each checklist item in real-time during an audit, inspection or observation.

Instantly generate and assign corrective actions for individual checklist items when nonconformances are identified, right from your desktop or mobile device

View all audits, inspections and observations throughout your entire organization from one location, and sort by workflow status, location, date, and assigned individuals

Automatically send escalating email notifications to ensure deadlines are met and corrective actions are completed on-time

Attach documents, photos, links, and other audit and inspection information for fast, easy access and reference

Risk Management Mobile App (Android / iOS)

Empower your employees to complete audit and actions at time anywhere using their mobile device

Instantly generate associated notifications right from your tablet or smart phone

Instantly receive notification with new actions raised to immediately assign responsible member from EHS Team
