# Green Codes
EHS Solution

Safety Observations
Enhance employees engagements

Makes it easy for your workers to accurately record and submit safety observations regarding behaviors, activities, or situations that they encounter

Enhance the EHS Culture

Observation forms can only capture a safety observation or they can be customized to add additional information such as the task being performed, tool being used, PPE being worn, location of work, and anything else the user needs. Capture and annotate photos directly from your mobile device for easy reporting.

- Proactively observe and provide feedback on safe work practices
- Use historical observation data to look for trends
- Automated workflows improve speed and efficiency
- Mobile apps increase efficiency and effectiveness
- Ability to add files / photos / voice recording
- Attach any photo or documents with easy uploading

Mitigate Risk & Manage EHS Processes   —

Improve your EHS management programs using leading and lagging indicators.

Communicate and Educate   —
